DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 11 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the British patent, 1,260,144 (see marked-up attachment).

Regarding claim 11, the British patent discloses in Figure 3 a ball-and-socket joint having a joint pin 10, a joint housing 18, a bearing shell 78, and a metal ring A7. The joint pin 10 is provided with a joint ball 16. The bearing shell 78 is inserted into the joint housing 18. The metal ring A7 is embedded in the joint housing 18. The metal ring A7 has a radially inwardly bent end segment 76 located in an area of an opening A1 in the joint housing 18. An inside diameter A5 of a cylindrical center part of the metal ring A7 corresponds to an outside diameter of the bearing shell 78. However, the British patent fails to disclose the joint housing 18 being a plastic joint housing.

Applicant is advised that, within the general skill of a worker in the art, selecting a known material on the basis of its suitability for the intended use is a matter of obvious

Application/Control Number: 09/554,025 Page 3

Art Unit: 3679

design choice. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the joint housing out of plastic therefore making a plastic joint housing. *In re Leshin*, 125 USPQ 416.

Regarding claim 14, the cylindrical center part ends in an area of an equator of the joint ball 16.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over the British patent, 1,260,144, in view of Kindel, 3,530,495.

Regarding claim 18, the British patent, as modified above, fails to disclose the joint housing 18 provided with a ring groove in the area of the opening A1. Kindel teaches in Figure 1a joint housing 1 provided with a ring groove (unmarked) in an area of an opening 1b to alternatively attach a sealing bellows 5 to the joint housing 1. Therefore, as taught by Kindel, it would have been obvious to one of ordinary skill in the art at the time the invention was made to place a ring groove in an area of an opening of a housing to alternatively attach a sealing bellows to the housing.

Allowable Subject Matter

Claims 20-23 are allowed.

Application/Control Number: 09/554,025 Page 4

Art Unit: 3679

Claims 12, 13 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

regarding claim 12, the prior art of record does not disclose or suggest a balland-socket joint comprising a metal ring having a radially outwardly angled flange that is extrusion-coated with material of a joint housing;

regarding claim 13, this clam depends from claim 12;

regarding claim 15, the prior art of record does not disclose or suggest a ball-and-socket joint comprising a bearing shell including a pin-side area provided with slits; Morin disclose a ball-and-socket joint comprising the bearing shell as claimed, but there is no reason to modify or combine the British patent with Morin;

regarding claims 16 and 17, these claims depend from claim 15; and,

regarding claim 20, the prior art of record does not disclose or suggest a balland-socket joint comprising a metal ring having a cylindrical portion protruding from an opening of a joining housing and forming a passage receiving a bearing shell.

Response to Arguments

Applicant's arguments with respect to claims 11, 14 and 18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Ernesto Garcia whose telephone number is 703-308-

8606. The examiner can normally be reached from 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynne H Browne can be reached on 703-308-1159. The fax phone

numbers for the organization where this application or proceeding is assigned are 703-

872-9326 for regular communications and 703-872-9327 for After Final

communications. Any inquiry of a general nature or relating to the status of this

application or proceeding should be directed to the receptionist whose telephone

number is 703-308-2168.
